Provisions of the Agreement

This agreement is made and entered into by Information Technology Curves, Inc. ("IT Curves" or "Provider") registered at 8201 Snouffer School Road, Gaithersburg, MD 20879 and **Port City Taxi** ("Customer") registered at **2027 Carolina Beach Rd, Wilmington, NC 28401** for the provision of IT Curves' software solutions.

IT Curves provides the required products as selected in the Pricing Attachment and described in the Product Description Attachment, as a cloud hosted solution, in which:

1. Cloud-based Software as a Service (SaaS)

Server hardware and third-party software licenses will be provided by IT Curves as required for IT Curves' product and services.

IT Curves will train and assist Customer staff to configure and setup the IT Curves software according to Customer practices and to include all Customer data.

Customer will supply all hardware, third party software licenses required to operate the workstations for its staff at its operation center as noted in Customer Furnished Items Attachment.

2. In-Vehicle Smart Devices and In-Vehicle Equipment

IT Curves will provide the software application for the driver devices, as well as the backseat payment interface modules (when applicable).

Customer will supply all in-vehicle smart devices, hard meters, holders, chargers, any other in-vehicle equipment, and wireless data plans from wireless carrier of its choice.

3. Delivery, Installation, Training and Post-Delivery Support Services

IT Curves will provide Customer with pre-delivery preparation, on-site implementation, and post-delivery support services, as defined in the Provision of Services Attachment.

4. Schedule of Delivery

IT Curves plans on delivering the products and services defined in this Agreement based on the defined schedule of delivery as agreed.

5. Contract Value & Payment

The total value of this contract includes certain one-time fees, and certain monthly recurring fees which along with payment milestones are shown in the Pricing Attachment and Schedule of Delivery Attachment.

Customer is responsible for the payment of any and all sales and/or use taxes for software and hardware shipped to customer.

6. Terms and Duration

The initial term of this Agreement is 1 month beginning on effective date of agreement. Thereafter, this Agreement will automatically be renewed monthly until terminated.

7. Limitation of Liability

IT Curves' liability is limited to any willful misconduct or negligence by its officers, employees, and agents in the installation and service of the hardware and software. Liability will be limited to actual compensatory damages only and Customer waives any claim for special damages, incidental damages, and consequential damages, including, but not limited to lost profits, interruption of business, or related expenses. Provider's total liabilities will not exceed total contract value.

Signed and effective as of the date of final signature and receipt of first payment.

Attachment: Provision of Services

The services provided by IT Curves professional technical staff include:

System Setup

1. Pre-Delivery / Customer Requirement Capture for Customization of Setup

IT Curves will review the Technical Description during conference calls and in-person with Customer staff to capture Customer's operational requirements and train and assist the Customer in configuring the features relevant to the purchased products, which may include the following: Affiliates and affiliate attributes, Drivers and Vehicles for each affiliate, system wide geographical setup including operating zones and stands, Route parameters, depots and route starts setup, Points of Interests, Usernames and Passwords, and Fare calculation rates.

Customer will provide adequate time and effort for IT Curves to obtain these requirements.

IT Curves is in no way responsible for the equipment and equipment setup on the Customer's premises, such as network, internet access, firewall, or any other on-premises equipment configuration or setup.

Delivery and Training

1. Pre-Delivery / Operation Readiness Review

At the end of the Initial Staging, our staff will demonstrate the system setup to Customer via the remote access software.

2. Training of Customer Staff

IT Curves staff will provide hands-on training for each module for up to two call center and dispatch operators, two managers, and two driver trainers. The Training may be provided online or onsite and is priced in the Pricing Attachment.

3. Network Setup

The Customer shall set up its own network, addressing, router, firewall, and anti-virus environment.

Post-Delivery Support Services

1. Phone Support

IT Curves staff provides phone support to Customer under the hosted solution agreement. Hours of phone support are between 8:00 am – 5:00 pm Eastern Standard Time Monday through Friday. Emergency Support is available 24 hours a day, 7 days a week.

Attachment: Customer Furnished Items

The following items are the responsibility of the Customer (as applicable):

1. Wireless tablet of Customer's choice, power chargers, and in-vehicle mounting installation hardware.
2. Credit card readers
3. Wireless data plan: 1GB per vehicle per month recommended.
4. Bluetooth connection devices
5. Internet connectivity in Customer office (20Mbps minimum).
6. Office network infrastructure and computer hardware for staff.
7. Office computers running the following or better: Intel Core i7 Processor, 8GB RAM, and 500GB hard drive.
8. Time for IT Curves to review technical description and programmatic services in timely manner.
9. Time for IT Curves to perform setup.
10. Office trainer to learn how to operate office software and to train Customer staff.
11. Driver trainer to learn how to operate in-vehicle software and to train Drivers.

Attachment: Schedule of Delivery

Actual completion of timeframes may vary.

Item	Milestone	Timeframe	Charges Due

Attachment: System Description

To: **Ronnie Parker**
Port City Taxi, Inc.
2027 Carolina Beach Rd,
Wilmington, NC 28401

May 13th, 2022

From: **Joshua Thomas**
Dir. of Sales and Marketing, IT Curves
8201 Snouffer School Rd,
Gaithersburg, MD 20879

Ronnie,

It was a pleasure learning about your transportation services and what solutions you need. With IT Curves, we can accommodate all of what you are looking for in a dispatch system to upgrade to, including integration with ModivCare.

Our system is ready to go for your needs and our team is available to get your system up and running quickly and will support you and your staff throughout the process to ensure the switch is a smooth transition. We are available by phone both during this transition and after cutover and take customer satisfaction and support very seriously.

In this document includes highlights of our various software modules we're offering to you based on the needs communicated with us, and then pricing for your operation based on only those modules you need for your operation. Once you've reviewed, lets setup a time to discuss any questions you may have and the next steps!

Best regards,
Josh

Intelligent Dispatching

- Fully automated system, with semi-auto capabilities and manual management override
- Patented dispatch algorithm with multiple setup options (closest vehicle, zone & stand rank)
- Group trips into routes/manifests, individual or shared rides
- Per zone dispatch settings – every zone can be configured individually and dispatch differently
- Wall trips – drivers can self-dispatch trips
- Graphical user interface– displays process and logic of trip assignments to vehicles
- Trip Reporting
- Mini routes once built can be released for auto dispatch to send offers out to the vehicles based upon rank and distance formula
- Powerfully configurable fare calculations – by account, zone, zip-code, address

Vehicle Live Map & Playback

- Live tracking – configurable GPS reporting based on distance and/or time travelled
- Displays both vehicles and passengers
- Vehicle status (Available, Break, Occupied, Disconnected, Enroute to Pickup or Enroute to Drop off)
- Displays passengers on board, vehicle speed, direction
- Passengers/trip status & ETAs shown on map along with vehicle/driver dispatched to trip
- Multiple filtering and display options
- Playback by single vehicle/driver, multiple via comma separation, range or even region within a selected time frame

Route Manifest Builder

Designed to take in thousands of trips and create efficient ride sharing routes, IT Curves' Manifest Builder minimizes capital cost by using a lower number of vehicles and optimizes the operating cost by lowering driver hours.

Manifest Builder uses IT Curves' patented Efficient Ride Sharing Algorithm (ERSA) to build thousands of trips into routes using a minimal number of vehicles and lowering operating hours. ERSA optimizes the operator cost and complies with many contractual Service Level Agreements (SLA) parameters including pickup or drop off windows, maximum ride times, maximum driver hours per day, and vehicle capacity.

The screenshot displays the IT Curves Route Manifest Builder interface. It features a sidebar with navigation options like 'Route Management', 'Vehicle Management', and 'Driver Management'. The main area contains several data tables. The top table lists trips with columns for Job#, Name, Sch PU, dAppt, EdStart, EdEnd, LOS, PUAdd, PUQty, DOAdd, DOQty, VCapacity, and Assoc. Below this, there are more detailed tables for route assignments, including columns for Job#, Name, Sch PU, dAppt, EdStart, EdEnd, LOS, PUAdd, PUQty, DOAdd, DOQty, PUZone, DOZone, LOS, and nTotalPUQty. The interface also includes various filters and search options on the left and top, and a status bar at the bottom showing summary statistics like 'Total Trips: 102', 'Routes: 251', and 'Vehicles: 16'.

- **Load and Verify Trip Data**
 - bulk upload from Excel/CSV files
- Remove duplicate trips
- Edit/correct data
- Build efficient routes automatically and manually using our patented *ERSA* algorithm
- Combine trips from multiple providers
- Configurable Service Level Agreement (SLA) Constraints
- Limit driver's daily time
- Add/remove trips for in-progress routes
- Displays all routes and stops on an interactive map
- And much more...

Driver App

Authenticate and Control Driver Access

- Only manager-approved devices
- Available for Android tablets and Phones (iPhones with some limitations)
- Choose trip data visible to driver
- Instant communication to the back office / dispatch
- Set login time restraints
- Allow limited driver breaks
- Lock and disable devices

Dispatch Trip & Route Details to Driver

- Allows for direct dispatch or a traditional bidding system
- Wall trips displays trips based on time and distance from driver location
- Displays detailed customer/trip information
- Accurate Google Maps-based navigation – turn by turn, voice guided

Track and Record Locations, Time Stamps and Actions

- 2-way Messaging with dispatch/management – free text or canned messages
- Passenger call-out capability when paired with IT Curves' phone system
- Instant trip updates upon no show, cancelations, and reservation changes
- Trip fare estimates
- Manifests displayed in order of stops
- Digital signature-capture capable
- Credit card & smart card processing
- Integrated with Centrodyne and Pulsar meters
- Receipt printing supported on taxi meters and blue bamboo

Useful Driver Tools

- Automatic/manual Call Out (robo-call) to customer upon driver arrival *
- List of all zones and upcoming # of trips
- Audio reading of Text Messages from Dispatcher and Driver can text back
- Driver can view their daily revenue reports
- Digital Radio Communication with Dispatchers (PTT) *
- Receive (C2D) and initiate (D2C) Calls with Passengers, keeping both phone numbers private *

* Requires Driver Telephony Feature Pack

MARS Booking Application

The MARS Booking App is a powerful smart phone application that connects riders to a national network of safe ground transportation services that are licensed to operate within regulations.

- Provide trip cost estimates
- Book trips instantly on demand or scheduled
- Powerful promotion options available to attract riders
- Find a cab in 60 seconds with quick booking
- View driver info and track driver to pickup with ETA
- Riders can call drivers with private Caller ID
- Pay within the app with secure credit card processing, or in-vehicle with cash or voucher/pre-paid accounts
- Book trips for friends and family
- Review trip history
- Passengers rate drivers and provide feedback
- Set your service options, company policies and regulations
- Manage your app and view statistics with your own dedicated portal

Integrated Trip Data from Dispatching

- Completely integrated with the other modules, allowing for easy invoicing
- Modify/correct trip data prior to invoicing
- Choose appropriate data for invoicing
- No need for importing and exporting data to another system

Easily Generate Accurate Invoices

- Setup an unlimited number of Government and Corporate accounts
- Supports different rates by different accounts
- Assess administration fees and interest
- Allows for weekly, bi-weekly or monthly invoices
- "Batch Billing" enables creating multiple invoices at the same time

Manage Account Balances

- Post receipts and payments towards accounts
- Reverse receipts payments
- Track late payments
- Allows the short or over to be applied to certain trips
- Allows for re-invoicing of short payments
