

Change Request Response (CRR) Customer/Project: WMR		Date: Feb 10, 2026
Change Requested Notice by: Thomas Lee	CRR Number: (CRR028)	Attachment: 1. Design to Integrate Santa Online Reservation to WMR Apps 2. Test Plan for WMR Online Reservation Integration with Santa - V1.1
Change Request Notice 028 (CRN028) 's Details, Requirements: <i>Integration of Online Reservation for Santa with WMR</i> A. Integration of existing WMR Apps with Santa Clarita service provider using Spare APIs. Minimal GUI changes, primarily API integration work. <i>1. Reservation System & APIs Work Flow</i> A. Launch Online Reservation from WMR App 1) Call Fetch Recent Trips API to get 20 recent trips a) Parse the API and pull unique addresses B. Book New Trip 1) Call Time Negotiation API 2) Call Book Trip API 3) Call Get Confirmation# API C. Edit an Existing Trip 1) Call Get Trip Info API to pull trip UUID 2) Call Time Negotiation API 3) Call Edit Trip API D. Cancel a Trip 1) Call Get Trip Info API to pull trip UUID 2) Call Cancellation API <i>2. WMR API Enhancements</i> A. Update WMR Pull Trips API (add tripUuid, alpha-numeric referenceNumber) B. Update Trip Status Update API (add tripUuid, alpha-numeric referenceNumber) C. Update Trip Update API (add tripUuid, alpha-numeric referenceNumber) D. API/Database schema updates <i>3. Android App Integration & GUI Changes</i> A. Hide adaptive equipment section conditionally		

- B. Disable callout information section for Santa region
- C. Integrate API Changes
- D. Validate past address, space requirement, adaptive equipment, passenger type, time slot selection, reservation, edit & cancel flows
- E. Update Trip Display with alpha-numeric confirmation

4. *iOS App Integration & GUI Changes*

- A. Hide adaptive equipment section conditionally
- B. Disable callout information section for Santa region
- C. Integrate API Changes
- D. Validate past address, space requirement, adaptive equipment, passenger type, time slot selection, reservation, edit & cancel flows
- E. Update Trip Display with alpha-numeric confirmation

5. *Web App Integration & GUI Changes*

- A. Hide adaptive equipment section conditionally
- B. Disable callout information section for Santa region
- C. Integrate API Changes
- D. Validate past address, space requirement, adaptive equipment, passenger type, time slot selection, reservation, edit & cancel flows
- E. Update Trip Display with alpha-numeric confirmation

Change Request Notice Process:Change Request Notice Process:

Request was received from ASI via team meetings.

Motivation for Change Request Notice:

1. Enable riders to book trip, edit trip & cancel trip for Santa Region
2. Show alpha-numeric trip# on the Trip List of WMR App for Santa Region

Cost Proposal Estimate for CRR028

Reference to work breakdown and labor hours

Schedule:

- **Estimated Schedule will be 7 weeks after approval of CRR.**

Terms & Payment Milestones

- **50% of the cost of Change Notice will be paid upon approval of CN**
- **50% at completion of test and delivery**

Work Breakdown	Hours	Labor Classification	Discounted Hourly rate	Discounted Total
1. System Design/Review to a. Integration of Spare Reservation System (Santa) with WMR b. Enhance WMR APIs to show alpha-numeric trip# on the Trip List of WMR App. c. API Discovery Meetings with Spare	48	Product Line Specialist	\$95.00	\$4560.00
2. Integration with Spare Reservation System a. Get UUID of Rider ID i. Implement API call with query parameters ii. Parse response and extract UUID iii. Error handling iv. Unit tests b. Get Recent Past Addresses i. Implement API call with riderId ii. Parse 20 recent trips iii. Extract unique addresses iv. Merge with other region addresses v. Unit tests c. Get Alternate Time Slots & Fare i. Build complex query string with all parameters ii. Handle accessibility features array iii. Handle passenger array iv. Parse booking options response v. Extract time slots and fares vi. Unit tests d. Book Trip i. Construct booking request JSON ii. Submit booking with estimateId iii. Handle response iv. Error handling for booking failures v. Unit tests e. Get Trip Confirmation i. Retrieve trip details by UUID ii. Extract requestId (confirmation number) iii. Display alpha-numeric confirmation iv. Unit tests f. Edit Trip	64	Product Line Specialist	\$95.00	\$6080.00

i. Get existing trip UUID ii. Call time negotiation API iii. Submit edit request iv. Handle response v. Unit tests g. Cancel Trip i. Get trip UUID ii. Submit cancellation request iii. Handle cancellation reasons iv. Unit tests				
3. Manage Static Data Configuration a. Configure Spare Reservation API URLs b. Configuration for Set up Bearer Token authorization c. Configure serviceId d. Create Space Types key-value mappings (10 types) e. Create Passenger Types mappings (5 types) f. Create Adaptive Equipment mappings (4 types) g. Setup and unit testing	16	Product Line Specialist	\$95.00	\$1520.00
4. WMR API Enhancements a. Update WMR Pull Trips API (add tripUuid, alpha-numeric referenceNumber) b. Update Trip Status Update API (add tripUuid, alpha-numeric referenceNumber) c. Update Trip Update API (add tripUuid, alpha-numeric referenceNumber) d. API/Database schema updates e. Unit Tests	24	Product Line Specialist	\$95.00	\$2280.00
5. Android App Integration & GUI Changes a. Hide adaptive equipment section conditionally b. Disable callout information section for Santa region c. Integrate API Changes d. Validate past address, space requirement, adaptive equipment, passenger type, time slot selection, reservation, edit & cancel flows e. Update Trip Display with alpha-numeric confirmation	24	Product Line Specialist	\$95.00	\$2280.00
6. iOS App Integration & GUI Changes a. Hide adaptive equipment section	24	Product Line Specialist	\$95.00	\$2280.00

- conditionally b. Disable callout information section for Santa region c. Integrate API Changes d. Validate past address, space requirement, adaptive equipment, passenger type, time slot selection, reservation, edit & cancel flows e. Update Trip Display with alpha-numeric confirmation				
7. Web App Integration & GUI Changes a. Hide adaptive equipment section conditionally b. Disable callout information section for Santa region c. Integrate API Changes d. Validate past address, space requirement, adaptive equipment, passenger type, time slot selection, reservation, edit & cancel flows e. Update Trip Display with alpha-numeric confirmation	24	Product Line Specialist	\$95.00	\$2280.00
8. Perform Verifications as per Test Plan on QA Environment & on Production Environment Post Cut Deployment a. Functional Testing b. Integration Testing c. User Acceptance Testing	88	SIV Product Line Specialist	\$95.00	\$7600.00
Project Total	312		\$95.00	\$29,640.00
